EDUCATION

2019 - 2021

INDIAN STATISTICAL INSTITUTE

- MSTAT - Masters in Statistics
Grade: 73%

SKILLS

- Statistics: Probability Theory, Inference, Predictive modelling, Testing of Hypothesis
- Machine Learning: All sorts of SOTA supervised and unsupervised learning algorithms
- Deep Learning: CNN, RNN, Transformers, SOTA architectures
- Language Models: Finetuning, Prompt Engineering, Agent-based applications
- Programming: Python, R, Rust, C++
- Full Stack: React, NodeJS / Bun, FastAPI

OPEN SOURCE

- [Interact](#): A tool to create applications with LLMs. (Langchain alternative)

PRITAM DEY

DATA SCIENTIST

PROFILE

I am a data scientist who loves diving into tough technical challenges and transforming them into tools that make life easier and more insightful. With a versatile toolkit—from advanced AI and machine learning to large language models, full-stack development, and MLOps—I bring depth and creativity to every project I tackle.

I'm passionate about staying on the cutting edge of technology, and I believe in using it to drive impactful and ethical innovation. My goal is to make complex data not just accessible but truly actionable, helping turn intricate numbers into meaningful stories.

WORK EXPERIENCE

AI Lens Pvt Ltd.

JUNE '24 - PRESENT

Principal Data Scientist

- Led end-to-end development and fine-tuning of Large Language Models for code translation between SAS and R
- Architected and implemented AI powered business analytics solutions, using SOTA machine learning models and LLM to generate insights.
- Implement full stack analytics application using Fast API, React and AWS.

Syngenta India Pvt. Ltd.

MAY '23 - JUNE '24

Data Scientist

- Implemented advanced clustering algorithms for genotype analysis, incorporating genetic hierarchy validation
- Developed computer vision models for plant phenotyping and disease detection using drone imagery
- Led cross-functional teams in delivering scalable ML solutions for agricultural application.

Dr. Reddy's Laboratories Ltd.

AUG '21 - APRIL -23

Data Scientist

- Designed and implemented enterprise-wide search engine for investigation data
- Built predictive models for product stability analysis and quality control
- Developed intelligent scheduling system using genetic algorithms for medical representative routing
- Created computer vision solutions for visual aid analysis in medical communications

PUBLICATION

- MRI-based mild cognitive impairment and Alzheimer's disease classification using an algorithm of combination of variational autoencoder and other machine learning classifiers. ([Journal](#))
